We, the undersigned, support ATV access to public land. Give the Vermont ATV Sportsman's Association (VASA) a chance to prove that ATV trails on public land can be managed successfully. Please support a three-trail trial where the success of ATV trails on public land can be tested on the ground rather than speculated and argued about endlessly. The three-trail trial is not a victory by VASA: it is a compromise with access opponents. By our signatures below, we agree with ATV access to public land and giving VASA a chance:
